

NEW PRODUCT ANNOUNCEMENT

550-0100 Compact Style Power Lock Actuator

New Hampton, IA—December, 2021 —TriMark's 550-0100 Compact Style Power Lock Actuator is now available in both 12V and 24V versions providing a push/pull function. It's 'best in class' performance has been tested and validated to meet stringent requirements thus ensuring a long life of trouble-free operation. Provided with thermal protection for excessive heating due to extreme usage as rapid, frequent operations or sustained activation as well as a varistor for electrical transient noise reduction. A clutch mechanism provides for soft starts/stops and allows for manual override with key. Other product details include:

- Reliable and durable to high cycle counts in various environmental extremes
- Tested to 10.0 lbs./44.5N with .83" (21mm) travel
- It is available in either a bellows or wiper style plunger and includes a rotatable/detachable tip for ease of application
- Wiring options are blunt ends, bullet connectors, spade or Delphi connectors. Possible customization is available including special connectors and custom wire lengths

Bellow Style

Wiper Style

TriMark's power actuators are designed for handles and latches with a push/pull locking function and are easy to install either by integrating mounting directly into TriMark latches and paddles or with universal hardware parts for flexibility.

System kits are available and include handles, latches, accessories/brackets and keyless entry e-ASK systems to provide a comprehensive electro-mechanical access solution.

###
