

Door Systems—Providing the Big Picture Solutions

TriMark offers a comprehensive selection of quality hardware products. Our application engineering experts can assist you in selecting the right products and components to complete your system solution.

Designing and implementing a full door system solution requires a wide range of high-quality products working together to form a rugged, reliable system. As a world leader in vehicle door hardware, TriMark's products sets the standard in excellence, design and value in the field. Our latches, strikers, handles, hinges, linkages, locks, accessories and related system components ensure complete and proven compatibility—time and time again.

At TriMark, we take pride in the details, such as opening/closing efforts, structural support, appearance, construction, safety, security, ease of assembly, quality, durability, sound of operation and overall value. The result? A full door system solution that's fit for function today and well into the future.

Rotary Latch:

The rotary latch is the heart of the door system. Years of careful engineering and customer collaboration have led to latches that feature the highest levels of quality, security and strength to meet virtually any application.

Logic Mechanism:

TriMark's logic mechanisms connect handles and latches and provide unique locking and operating functions. The connectivity and functionality of which meet FMVSS 206 (ECE R11) requirements and will form part of the latch assembly or exterior handle assembly.

Exterior Handle:

TriMark's exterior handles are developed with hands-on applications in mind. Many are designed around a specific market or application, taking into consideration style, functionality, vehicle width and desired level of security.

Interior Releases:

Today's door designs demand ergonomic placement and ease of function for the inside release. As always, we also consider style, functionality, mounting, installation, materials and finish.

Rods/Cables:

The varied applications for door systems demand versatility. TriMark excels at remote release, utilizing rods and/or cable connections. Our rods and cables efficiently transfer mechanical input from the operator and enable quick and safe operation.

Power Lock Actuator:

TriMark's power lock actuators are designed to integrate with our handles and latches. They're equipped to accept a power lock actuator, and provide an electrically powered lock/unlock function, as well as facilitate mechanical override.

Keyless Entry:

For additional convenience, functionality and safety, our comprehensive selection of components and systems allows for complete keyless entry, security and ignition control for vehicles and equipment. Standard controls are available for immediate integration, as well as custom adaptation for specific customer requirements.
