

020-0910 Inside Squeeze Release - Remote

This product was specifically designed for off-highway vehicle applications including agricultural and construction equipment that require a remote inside release that mounts into an existing tubing provided by the customer.

DESIGNED FOR:

- Medium to heavy weight doors for off-highway vehicle applications
- Doors where it is desirable to have the inside release remotely located to the latch location
- Use with 25mm (.98") diameter steel tubing—customer provided

TriMark Corporation

FEATURES/BENEFITS:

- The inside release can be positioned at any point along the tube for convenient location to suit the door/cab design over direct lever releases
- Non-handed design is adaptable for door on either side of vehicle
- The inside release is connected by a rod or cable to the latch and includes an integrated return spring
- The cam detail in the inside release is reversible allowing the inside release to be actuated in the opposite direction providing flexibility in the product application
- Two versions available;
 - ◊ Version 1 installs without tools and snaps in the tubing
 - ◊ Version 2 requires (2) M5 thread forming cap screws and provides an anti-pinch squeeze handle

VERSION 1

VERSION 2

MATERIAL:

- Inside release components: Glass reinforced nylon

INSTALLATION:

- The inside release sub-assembly installs into the pipe and includes a flange that covers the tubing cutout
- Version 1 snaps in the tubing
- Version 2 requires (2) M5 thread-forming cap screws

U.S. Patent No. 8,011,699

CAUTION: Product does not meet the locking requirements for FMVSS 206.

Individual part dimensions are for reference only. Refer to individual part drawings for complete dimensions, specifications, and installation procedures. Engineering assistance and application drawings are available.
