Compression Hook Latch

This simple lever operated compression hook latch provides a secure over-center action and the spring-loaded eye-hook incorporates tension to keep panels rattle free and secure. Designed for applications where the latch and keeper are surface mounted on the same plane, folding the robust lever down pulls mating in-line panels tight.

DESIGNED FOR:

- Medium to heavy-duty off-highway panel and compartments where pull-in function and resistance to vibration loads are desired

FEATURES/BENEFITS:

- Robust construction: welded steel housing and mounting base
- Easy to operate (ergonomics), folding the robust lever down pulls mating in-line panels tight.
- The KeyOne™ Plus locking system allows the operation of multiple onboard locking hardware with a single key or the option to key differently
- Universal design is non-handed
- Enclosed latching rod/spring retainer reduces flex and failure
